-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2829

1. In response to Applicants' remark filed on 09/15/03, it appears that claim 1 is a generic claim. However, non-elected claims 4-5 are still withdrawn from consideration since generic claim is not allowable at this time.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Inoue (Pat # 3,707,636).

As to claim 1, Inoue discloses an apparatus as shown in figure 4 having an alternating signal (150) impress alternating signals to electrostrictive elements (101,102,103) and a detecting means (161,162,163) for converting a distortion (vibration) of the electrostrictive elements and converting that distortion into an electrical signal.

4. Claims 2-3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not disclose detecting means comprises a piezoelectric element that deforms in proportion to the amount of deformation of the electrostrictive element., the locations of the electrostrictive elements and their shapes.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2829

Takata et al (pat # 4,912,351) disclose piezoelectric motor.

Kawada (Pat # 3,691,410) discloses method of operating piezoelectric transformers.
